PERFORMANCE WORK STATEMENT (PWS)
MARINE CORPS MOUNTAIN WARFARE TRAINING CENTER (MCMWTC)
INFORMATION MANAGEMENT OFFICER SUPPORT SERVICES

1. INTRODUCTION

This PWS defines the MCMWTC Contractor requirements in support of the Marine Corps Mountain Warfare Training Center. Throughout this PWS, the MCMWTC Contractor is referred to as “Contractor.”

The Contractor shall provide all labor, material, and non-personal services that are necessary to perform the operational support and subject matter expert (SME) requirements described in this PWS. The Contractor must ensure their work efforts fully support the MCMWTC mission and key tasks. The Contractor is expected to demonstrate a work ethic and the professionalism required to support MCMWTC in accomplishing their assigned mission.

This contract is designed to provide MCMWTC with a flexible and adaptable support foundation that can be efficiently and effectively utilized to match the unpredictable and emerging requirements MCMWTC must be capable of responding to. The uniqueness of this purposefully developed PWS is required to support the needs of MCMWTC’s customer-the Marine Corps’ ground combat element operating forces.

1.0. BACKGROUND.

1.0.1 MCMWTC Mission. The MCMWTC conducts advanced individual training as the formal school for Mountain Warfare and Cold Weather Operations, develops warfighting doctrine, supports Research, Development, Test, and Evaluation for specialized equipment, and conducts service level MAGTF integrated exercises in order to facilitate increased Marine Corps readiness. As a Service Level Training Installation, the MCMWTC manages facilities, services and support to the operating force, permanent and tenant personnel and their families to ensure the readiness and mission accomplishment of this command.

1.0.2 Information Management. The term information generically refers to all facts, data, or instructions in any medium or form. The commander requires quality information to understand situations and events and to quickly control the challenges that confront him. Marine Corps Doctrinal Publication (MCDP) 6, Command and Control, states that information serves two purposes: to help create situational awareness as the basis for decisions and to direct and coordinate actions in the execution of a decision. Quality information adds value to the decision-making process and is critical to the success or failure of an operation. Therefore, the commander must determine his information requirements and ensure that information is managed effectively.

The Marine Corps operating environment of today and the emerging threats of tomorrow requires force mobility, unit dispersion, and command agility. As we move into the future, the ability to simultaneously share quality information from various locations will be necessary if the commander is to make effective command and control (C2) decisions. Information management addresses information as a commodity instead of a technology and is performed at all levels, regardless of the extent of automation. Effective information management delivers critically important information in a timely manner to those who need it in a form that they can quickly understand.

Information management includes all activities involved in the identification, collection, filtering, fusing, processing, focusing, dissemination, and usage of information. It assembles information that promotes understanding of the battlespace and enables the commander to better formulate and analyze courses of action, make decisions, execute those decisions, and understand results from previous decisions. Information management provides the quality information a commander needs to support the decision-making process.

Information management provides the right information to the right people at the right time for situational awareness or decision-making. It consists of three mutually supporting pillars: people, technology, and process. People (customers and data processors) are the ultimate users of information; they provide expectation, policy, and guidance for the end-product. Technology (hardware and software) is the physical network and systems used by people to

collect and process data. Process (procedures and policy) is the implementation of best practices that integrate the three pillars, provide efficiency, and eliminate duplication for effective information flow according to the operational requirement. Aligning the three pillars focuses the collaboration or C2 capability (technology) for its intended effect and helps implement any necessary alternative solutions for integration shortfalls.

1.1 MISSION. The MCMWTC contractor shall support MCMWTC in the accomplishment of its mission (outlined above), by providing Subject Matter Experts and related services as defined in this PWS.

To successfully accomplish MCMWTC's mission in context to the requirements of this PWS, the MCMWTC requires support for information management to coordinate processes between staff sections ensuring accurate and focused information are delivered in a timely manner. The contractor uses commander's critical information requirements, report matrices, and request for information procedures, along with collaborative planning tools (such as internet/intranet web sites, knowledge portals, chat, video teleconferencing and email) to ensure information is translated into focused knowledge that facilitates decision-making.

The Information Management Officer (IMO) works directly for the MCMWTC Deputy Operations Director and under the cognizance of the MCMWTC S-3 Operations Officer due to the command wide breadth of the billet's responsibilities. On a daily basis, the IMO is positioned within the MCMWTC S3 Operations Section due to that section's primary responsibility for; providing direction, information, synchronization, and control of subordinate sections. Additionally, the S3 oversees MCMWTC Current Operations, Future Operations, Base/Installation Operations, Academics, Exercise Control, Range Control and Instructor Group. Co-locating the IMO within the S3 provides the contractor the best access, placement, and availability to assist the Commanding Officer with maximizing organizational information management. The contractor is the unit manager responsible for ensuring command information requirements are managed in compliance with MAGTF-TC, TECOM and USMC standards and guidance. Advises the Commander and staff on information management related topics during day-to-day operational planning. Consolidates and prepares all written materials (policies, Training Center Orders (TCO) & Annexes, SOPs, directives, Command & Staff updates, and training plans to support the MCMWTC Information Management strategy and activities as directed. Provides the command interface with the MAGTF-TC Knowledge Manager (KM) and MAGTF-TC Information Manager (IMO) for issues related to Information Governance, Records Management, Knowledge Management (KM) and Information Management (IM) training, Portal Management, KM and IM requirements, portal access control, portal account validation, IM business rules, portal permissions, Information Assurance/OPSEC and data accuracy.

2.0. SCOPE. The Contractor shall provide support to Information Management/Knowledge Management, Information Management Training, Portal Management, portal access control, portal account validation, IM business rules, portal permissions, Information Assurance/OPSEC and data accuracy. The scope of the Information Management (IM) requirements requires contractor personnel with a comprehensive knowledge of the IM technical fields to provide: 1) development and sustainment of IM processes, and 2) use of various IM systems. Contractor personnel shall participate in information and planning meetings; communicate with external IM entities and develop or provide input to briefings and reports. All items and or deliverables generated by the Contractor under this PWS, and all associated intellectual property, in whatever form, created, generated, or produced under this PWS shall become the property of the U.S. Government/Marine Corps in accordance with DFARS 252.227- 7020, Rights in Special Works, which will be included in this contract.

3.0. GENERAL REQUIREMENTS.

3.1 WORK LOCATIONS. The majority of work shall be performed at Government facilities via approved Non-Secure Internet Protocol Router Network (NIPRNET) systems and Secret Internet Protocol Router Network (SIPRNET). However, travel to CONUS locations is anticipated to support off-site conferences, working groups, and professional development. All travel costs must be included in the unit cost of each individual CLIN, and travel will not be reimbursed separately by the Government.

3.2 PERFORMANCE STANDARDS. The Contractor shall provide the necessary resources and infrastructure to manage and administer the performance tasks as defined in this PWS.

3.3 GOVERNMENT RESPONSIBILITIES AND INTERFACE. 4.1 MCMWTC IMO SUPPORT:

The SME for Information Management will be required for support to formal schools, Service Level Training Exercise (SLTE) and Base/Installation Operations.

4.1.1 INFORMATION MANAGEMENT OFFICER SME SUPPORT:

The technology revolution and resulting abundance of new C2 systems and applications have exponentially increased the complexity and amount of data that must be viewed, sorted, collated, disseminated, and managed by military forces. Operational level headquarters can no longer rely solely on the electronic mail (e-mail) inbox to understand, visualize, plan, and direct operations. Organizations that do not adapt to technological advances may become overwhelmed or distracted, losing the ability to maintain relevant situational awareness and/or make timely and informed decisions. Leaders make decisions based upon their personal understanding of a situation; such an understanding develops through information assimilation and refines through the lens of personal experience, intuition, and judgment. Historically, commanders achieved this understanding or situational awareness by personally viewing and visiting the battlefield; however, as the size, tempo, and complexity of the modern battlefield expanded, this approach became untenable. To compensate for modern realities, commanders and their staffs gain perspective from situation maps, text documents (e.g., messages, reports, status boards), and voice reports. The situation map and text information, combined with the commander's experience, intuitive reasoning, judgment, and personal contact with subordinate units, enables the commander to attain a level of understanding necessary to make informed decisions. Contending with the complexity characterized by conflict in the 21st century, warfighters need not only integrated systems, but also structured policy and guidance. Such direction should be combined with procedures that collect, process, and safeguard data and thereby facilitate efficient information assimilation, sharing, and collaboration. The aggregate of today's technology, procedures, people, and policy must provide shared situational awareness and decision support across a distributed network in dynamic and chaotic arenas.

4.2 Responsible for analyzing business and information requirements and designing SharePoint / Internet content prototypes and products. This includes the determination of the overall design and structure of SharePoint and Internet content, to include but not limited to creating content solutions using Microsoft 365, SharePoint Online, Power Platform products. Will work with customers to test developed content against requirements, monitoring and assuring quality, functionality, security, and integrity of the designed content to include writing and maintaining documentation, troubleshooting, and resolving technical problems with the design and delivery of products. This will include collecting and analyzing content use and performance statistics, providing design and delivery advice to content providers, applying information security/information assurance policies, principles, and practices as well as performing other duties as assigned. This role has both technical and administrative aspects and the contractor must demonstrate clear proficiency in both aspects.

52.212-2 ADDENDUM

The Government will award a Firm Fixed Price contract resulting from this solicitation to the responsible quoter whose quote conforming to the solicitation will be most advantageous to the Government, price and other factors considered. The following evaluation factors will be used to evaluate each quote. Award will be made to the quoter whose quote is determined to represent the overall best value to the Government using a tradeoff evaluation process:

- 1) The following factors shall be used to evaluate proposals: technical capability, past performance, and price. Technical and past performance, when combined, are approximately equal to cost or price.
 - i. Factor One: Technical capability; the offeror shall submit a capabilities statement and include a detailed narrative of how the contractor will accomplish the deliverables as outlined in the Performance Work Statement (PWS). Offerors shall submit a planned narrative detailing management approach, personnel qualifications, and risk management approach. Technically capability will be evaluated using the below adjectival ratings against submitted quoters' technical submission.

Combined Technical/Risk Rating Method

Color	Adjectival Rating	Description
BLUE	Outstanding	Quote indicates an exceptional approach and understanding of the requirements and contains multiple strengths, and risk of unsuccessful performance is low.
PURPLE	Good	Quote indicates a thorough approach and understanding of the requirements and contains at least one strength, and risk of unsuccessful performance is low to moderate
GREEN	Acceptable	Quote meets requirements and indicates an adequate approach and understanding of the requirements, and risk of unsuccessful performance is no worse than moderate.
YELLOW	Marginal	Quote has not demonstrated an adequate approach and understanding of the requirements, and/or risk of unsuccessful performance is high.
RED	Unacceptable	Quote does not meet requirements of the solicitation, and thus, contains one or more deficiencies, and/or risk of unsuccessful performance is unacceptable. Quote is unawardable.

- ii. Factor Two: Past Performance: the quoter shall provide information concerning recent (within the past three years) and relevant (as defined in Table 1 below) past performance in performing no more than four contracts of similar size and scope. Required information for each submitted past performance include contract numbers, agency provided for, contracting officer and COR information, period performed, and overall cost of each contract. In addition to the information submitted with the quote, the Contracting Officer shall consider the knowledge of and previous experience with the service being acquired, customer surveys and the Government-wide Past performance information shall be obtained from any other sources available to the Government, to include, but not limited to, the Contractor Performance Assessment Reporting System (CPARS), Federal Awardee Performance and Integrity Information System (FAPIS), Electronic Subcontract Reporting System (eSRS), or other databases; interviews with Program Managers, Contracting Officers, and Fee Determining Officials; and the Defense Contract Management Agency. The government will contact the

references provided. Overall past performance ratings will be determined using the below Performance Confidence Assessments Rating Method (table 2).

Table 1. Past Performance Relevancy Rating Method	
Adjectival Rating	Description
Very Relevant	Present/past performance effort involved essentially the same scope and magnitude of effort and complexities this solicitation requires.
Relevant	Present/past performance effort involved similar scope and magnitude of effort and complexities this solicitation requires.
Somewhat Relevant	Present/past performance effort involved some of the scope and magnitude of effort and complexities this solicitation requires.
Not Relevant	Present/past performance effort involved little or none of the scope and magnitude of effort and complexities this solicitation requires.

Table 2. Performance Confidence Assessments Rating Method	
Adjectival Rating	Description
Substantial Confidence	Based on the offeror's recent/relevant performance record, the Government has a high expectation that the offeror will successfully perform the required effort.
Satisfactory Confidence	Based on the offeror's recent/relevant performance record, the Government has a reasonable expectation that the offeror will successfully perform the required effort.
Neutral Confidence	No recent/relevant performance record is available or the offeror's performance record is so sparse that no meaningful confidence assessment rating can be reasonably assigned. The offeror may not be evaluated favorably or unfavorably on the factor of past performance.
Limited Confidence	Based on the offeror's recent/relevant performance record, the Government has a low expectation that the offeror will successfully perform the required effort.
No Confidence	Based on the offeror's recent/relevant performance record, the Government has no expectation that the offeror will be able to successfully perform the required effort.

- iii. Factor Three: Price; quoters shall provide prices in accordance with the CLIN structure for basic requirements (basic award). The Government intends to evaluate quotes and award without negotiations. The initial quote submitted must contain adequate information to ascertain the contractor's ability to comply with all requirements of the solicitation and it should contain the quoter's best terms from a price and technical standpoint. The Government reserves the right to conduct negotiations with one or more quoters, if determined to be necessary by the Contracting Officer.

Past performance will be evaluated in accordance with Department of Defense Source Selection Procedures

(h) Certification Regarding Responsibility Matters (Executive Order 12689). (Applies only if the contract value is expected to exceed the simplified acquisition threshold.) The offeror certifies, to the best of its knowledge and belief, that the offeror and/or any of its principals--

(1) [☐] Are, [☐] are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(2) [☐] Have, [☐] have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property;

(3) [☐] Are, [☐] are not presently indicted for, or otherwise criminally or civilly charged by a Government entity with, commission of any of these offenses enumerated in paragraph (h)(2) of this clause; and

(4) [☐] Have, [☐] have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds the threshold at 9.104-5(a)(2) for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

(A) The tax liability is finally determined. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(B) The taxpayer is delinquent in making payment. A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) Examples.

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. §6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. §6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. §6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. §362 (the Bankruptcy Code).

(i) Certification Regarding Knowledge of Child Labor for Listed End Products (Executive Order 13126). (iv) The compensation (wage and fringe benefits) plan for all service employees performing work under the contract is the same as that used for these employees and equivalent employees servicing commercial customers.

(3) If paragraph (k)(1) or (k)(2) of this clause applies—

(i) If the offeror does not certify to the conditions in paragraph (k)(1) or (k)(2) and the Contracting Officer did not attach a Service Contract Labor Standards wage determination to the solicitation, the offeror shall notify the Contracting Officer as soon as possible; and
